

Eastern Heights Utilities Continues Efforts to Protect Drinking Water

Eastern Heights Utilities (EHU) has developed a Wellhead Protection (WHP) Plan, which was approved by the Indiana Department of Environmental Management (IDEM) in November 2001. Since that time, the local planning team (LPT) has met annually to update the Plan and implement management strategies to help protect local drinking water sources. The WHP LPT held its most recent meeting on July 30, 2026. The WHP program focuses on public awareness, education, spill prevention, and reporting. A complete copy of the WHP Plan is available for public viewing at the EHU Utility Office, located at 316 North Washington Street, Bloomfield, Indiana.
